

Take part in our fundraising campaign!

Help us set up an unheard-of adapted training centre in Quebec that is based on a well-proven method ongoing for more than 10 years.

This centre will provide a neuroplasticity-based training program which has proved to be efficient, especially at the FSWC Regina centre. This centre may allow paraplegics and tetraplegics to recover lost physical functions, hence, greatly bettering their independence and quality of life.

We are seeking your financial aid in order to help us in opening this centre and making it available to Quebecers in 2021.
